

Genrec

Provider of Innovative Steel Solutions

Company Profile

The Company

Genrec, as part of leading engineering and contracts group Murry & Roberts, offers a unique combination of engineering disciplines in its field of operation. A comprehensive range of services is provided from structural steel fabrication and erection, heavy fabrication and machining. Together with the sister Murray & Roberts companies, Genrec covers the full spectrum of structural detailing, procurement, fabrication and construction.

Genrec's combination of manufacturing, construction and site management services, provide clients with a one-stop service.

Situated in Wadeville just outside of Johannesburg, South Africa, Genrec's facility has more than 55 000m² of undercover workshops and open 19 000m² areas equipped with the latest systems, CNC equipment, welding processes as well as high volume blasting and painting resources.

History

From humble beginnings in 1953 in a small office, in the heart of the Free State gold fields of South Africa, Genrec has grown into one of the largest engineering companies in Africa.

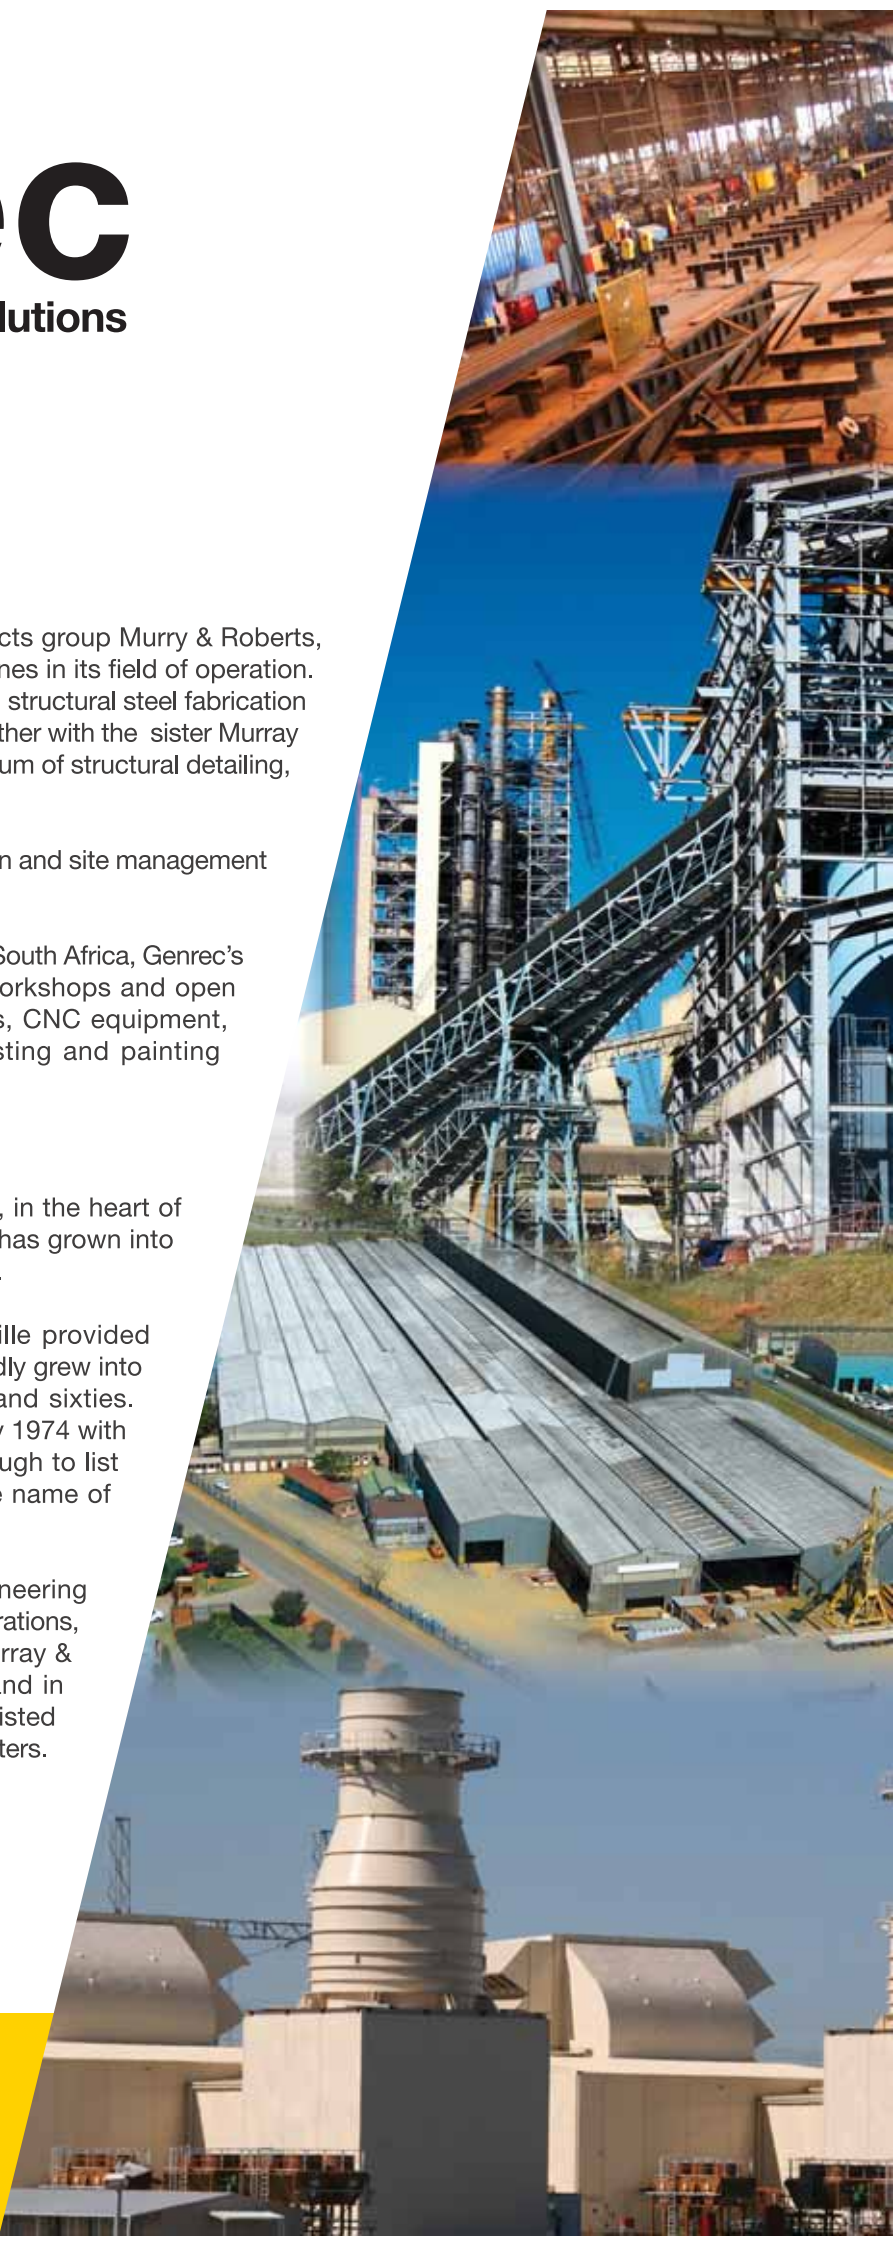

The one-man business, with its base in Wadeville provided breakdown and repair services to gold mines, rapidly grew into a vibrant family business throughout the fifties and sixties. Genrec started trading as General Erection, and by 1974 with a good track record Genrec had grown large enough to list on the Johannesburg Stock Exchange, under the name of Genrec.

In the same year Murray & Roberts, a large engineering and construction Group, decided to diversify its operations, and acquired 30% of Genrec shares. In 1988, Murray & Roberts acquired the controlling share holding and in 1992 Murray & Roberts acquired 100% equity, delisted the Group and split activities into separate profit centers.

Manufacturing Capabilities

The diversity reflected by our completed contracts, and our reputation, offer the competencies and skills that are available at Genrec.

Genrec's capacity to produce in excess of 2000 tons per month of structural steel, coupled with fabrication and machining of large complex fabrications, is one that very few other companies are able to offer, making Genrec one of the largest engineering companies in Southern Africa.

Services include:

- Project Management
- Design, detailing and shop drawings
- Light, Medium and Heavy structural fabrication
- Heavy machining
- Painting
- Transport

Divisions

- Structural Steel Fabrication
- Heavy Structural Fabrication
- Heavy Machining
- Steel Erection
- Special Projects

Markets

Genrec specializes in the manufacture of structures and equipment for process industries such as:

- Power Generation
- Mining
- Petrochemical
- Mineral beneficiation
- Infrastructure, oil and gas, and industrial

Clients

Genrec has delivered projects for a range of clients including Hitachi, Sasol, SNC Lavalin, Murry & Roberts Group companies, Krupp, Concor, Fluor, Anglo American, DeBeers, GRD Minproc and DRA.
